Joaquin Cardenas

Remote · Arequipa, Peru (UTC-5) | Joaquin.data.dev@gmail.com | linkedin.com/in/joaquincardenas-data | github.com/DaelFame

Financial data analyst with an accounting background and an engineering streak: I build the pipelines and dashboards that keep finance numbers reliable. I understand where a ledger entry comes from and how finance uses it, so decisions can keep being made on it. As General Manager of a restaurant, I moved operations from paper to digital records and used the data to justify every change; revenue grew 55%. At KPMG, I used Power Query, SQL and Python to clean very large Excel files so the audit work could start faster and stay focused. Accounting degree expected 2027. Based in Arequipa (UTC-5); worked in English at US resorts on two J-1 seasons.

Projects

Peru Budget Lakehouse | *Polars, DuckDB, Prefect, Docker* 2026

- Built an end-to-end public budget platform: 8M source rows into a 29.5M-row star schema with 131 automated tests and a reconciliation gate.
- Orchestrated with Prefect/Docker; added a Streamlit dashboard whose conversational layer answers budget questions in SQL.

UCSP Market Intelligence | *Power BI, DAX, Python* 2026

- Built a two-page Power BI decision deck on 17.4M public enrollment records, exposing a -1.6pp market-share leak hidden behind +19% volume growth.
- Growth is associated with distance-modality share ($r = 0.94$ across 5 private universities; $n = 5$) — an association, not a causal claim.

FP&A Forecasting & Variance Analysis | *Python, pytest* Competitive simulation

- Rebuilt four simulated years of statements into a driver-based model, tracing a 61% net-income miss to operating expenses and isolating EUR 150,000 of unsupported expenses.
- Pinned accounting identities and the variance tie-out with 83 automated tests (competitive simulation).

Experience

Audit Data Analyst Intern Jan 2026 – Mar 2026
KPMG en Peru *Lima, Peru*

- Reconciled accounts and validated data for IFRS audit engagements; cleaned very large Excel files with Power Query, SQL and Python so the audit work could start faster.
- Ranked 1st globally in KPMG's Audit Foundations 1 training program (international cohort).

Operations Analyst Aug 2024 – Aug 2025
La Katita — Government & Corporate Contracting *Arequipa, Peru*

- Managed logistics, budgeting and administration for large-scale institutional food service.
- Tracked budget vs. actual spend and built routing metrics that cut delivery times by 15%.

Operations & BI Analyst Jun 2023 – Jul 2024
Triburritos — Fast Casual Food Industry *Arequipa, Peru*

- Built automated Power BI dashboards for cash flow, labor and KPIs, raising reporting efficiency 30%.
- Analyzed transactional sales data to identify revenue leaks and cost optimization opportunities.

Accounting Systems & Data Associate Jan 2023 – Jun 2023
Talleres Escarcina Torres — Automotive Service *Arequipa, Peru*

General Manager & Revenue Analyst May 2020 – Jun 2022
Toro Loco Bar & Grill — Restaurant *Arequipa, Peru*

- Moved restaurant records from paper to digital systems, then used the data to justify each operational change.
- Analyzed sales trends and implemented electronic invoicing, driving a 55% revenue increase.
- Managed full P&L and built Power BI dashboards for cash flow, labor costs and revenue KPIs.

Operations Associate Dec 2016 – Mar 2017 & Dec 2019 – Mar 2020
J-1 Program — Hospitality Operations (USA) *Hawaii & Ohio, USA*

Education & Certifications

Bachelor's degree in Accounting Expected 2027
Universidad Católica San Pablo (UCSP) *Arequipa, Peru*

Power BI Professional 2022
TECSUP *Arequipa, Peru*

- Data Analytics for Finance — Universidad Católica San Pablo (2026)
- Python Essentials 2: Intermediate — Cisco (2026)
- SQL Interactivo — Desafío Latam (2024)
